

MPT HIFU

Ultraformer MPT is the technology of MMFU in the second year of its creation. It can cure faster and more effectively. It has a variety of energy output modes and depths, and can achieve multiple modes of treatment. I believe these new technologies will bring many unique benefits to the treatment, as well as additional value to doctors.

- 1, Mode: Dot and Line output Mode. The linear output takes less time and is slightly less painful.
2. 1.5mm Ultra booster pen : Type Circular Handle, 360 degree full coverage.
3. Incredibly Versatile: 3 handpieces & 10 interchangeable transducers.
